

UNPLANNED // COMMERCIAL STARTUP BLUEPRINT

Zero-to-One Legal Incorporation, Jaipur/Rajasthan Schemes, Monetization & Free-Tier Cloud Operations

Founders: 2 Technical Co-Founders | **Hub:** Jaipur, Rajasthan, India | **Platform:** Unplanned (Hyperlocal Spontaneous Microadventures) | **Status:** Ready for Incorporation

EXECUTIVE STRATEGY BRIEF

This strategic masterplan transitions **Unplanned** from a functional MERN platform into a legally protected, funded, and revenue-generating consumer-tech enterprise in India.

It details **sub-Rs. 4,000 online incorporation**, accessing **Rs. 25L-60L in non-dilutive state funding** via iStart Rajasthan and Bhamashah Techno Hub (Jaipur), launching high-margin B2C/B2B monetization, and running 5,000+ MAUs on a **100% free-tier cloud architecture**.

Phase 1: Minimum-Cost Lean Legal Incorporation (Team of 2)

1.1 Entity Selection: Private Limited Company (Pvt Ltd) vs. LLP

For two technical co-founders bootstrapping an internet-scale platform, selecting between a **Private Limited Company** and a **Limited Liability Partnership (LLP)** requires balancing first-year statutory compliance overhead against future equity fundraising.

Evaluation Vector	Private Limited Company (Pvt Ltd)	Limited Liability Partnership (LLP)	Recommended Verdict
Initial Govt Fees	Rs. 1,000-2,500 (MCA zero ROC fee up to Rs. 15L capital)	Rs. 1,500-3,000 (FiLLiP + LLP Agreement stamp duty)	Comparable (Sub-Rs. 3K online)
Annual Compliance	Mandatory audit from Year 1 (AOC-4, MGT-7, DIR-3 KYC; ~Rs. 10K-18K CA fee)	Ultra-Low: Audit NOT mandatory until turnover > Rs. 40L or capital > Rs. 25L; ~Rs. 3K-5K/yr	LLP wins on initial cash burn
Founder Liability	Strictly limited to unpaid share capital value	Limited to agreed contribution in LLP Agreement	Equal asset protection
ESOPs & Equity Splits	Native equity share capital; supports ESOP pools, vesting schedules, and SAFE notes	Partnership units; no standard ESOP framework; complex profit-sharing amendments	Pvt Ltd is the VC standard
VC / Angel Readiness	100% preferred by institutional VCs and angel syndicates (priced equity rounds, convertible notes)	Cannot issue shares; VCs will mandate conversion from LLP to Pvt Ltd prior to term sheet closing	Pvt Ltd required for institutional capital

INCORPORATION COST-SAVING INSIGHT

Strategic Recommendation for Unplanned:

- **Incorporate as a Private Limited Company directly** if applying for the Rajasthan iStart Seed Grant (which awards higher evaluation points to registered Pvt Ltd startups with cap tables) or planning external angel funding within 12 months.
- **Zero MCA Fee Scheme:** Under Government of India's SPICe+ initiative, ROC incorporation fees for companies with authorized capital up to Rs. 15 Lakhs are **Rs. 0**. You only pay state stamp duty (~Rs. 1,000-1,500 in Rajasthan) and PAN/TAN processing fees (~Rs. 130).

1.2 100% Online Registration Roadmap via MCA SPICe+

Step 1: Digital Signature Certificates (DSC - Class 3) — Both co-founders obtain Class-3 DSC with signing capabilities via Aadhaar e-KYC (eMudhra, Vsign, Capricorn). Total: ~Rs. 1,500.

Step 2: MCA SPICe+ Part A (Name Reservation) — Propose names (e.g., 'Unplanned Expeditions Private Limited' or 'Unplanned Social Technologies Private Limited'). *Pro-Tip:* Submit Part A and Part B together in a single filing to save the separate Rs. 1,000 reservation fee if your brand name is distinctly unique.

Step 3: SPICe+ Part B (Integrated Filing) — Simultaneously registers DIN, drafting e-MoA (Object clause: Web/Mobile Social Network, Tourism, Geospatial Discovery), e-AoA, and EPFO/ESIC.

Step 4: AGILE-PRO-S Integration — Auto-generates Company PAN, TAN, Professional Tax, and initial bank account opening.

Bare Minimum Government Outlay: DSC (Rs. 1,500) + Rajasthan Stamp Duty (e-MoA/AoA ~Rs. 1,200) + PAN/TAN (Rs. 130) = **Total Statutory Cost: ~Rs. 2,830 to Rs. 3,500.**

1.3 Banking, MSME (Udyam) & GST Strategic Matrix

A. Instant Free Udyam (MSME) Registration:

Immediately after incorporation, register on udyamregistration.gov.in using the company PAN and Aadhaar. It takes 5 minutes and is **100% free**. **Strategic Benefits:** Protects Unplanned under MSME Micro Category (mandates commercial clients to pay within 45 days under penal interest), unlocks 50% trademark filing subsidies, and qualifies for priority sector lending.

B. GST Number Strategy (Exemption vs. Voluntary Registration):

- **Threshold Exemption:** Under Section 22 of the CGST Act, service providers with aggregate annual turnover below **Rs. 20 Lakhs** are legally exempt from mandatory GST registration.
- **Interstate E-Commerce Caveat:** If Unplanned bills consumers across different states in India directly via payment gateways (Razorpay/Cashfree), Section 24 mandates GST registration regardless of turnover threshold.
- **Lean Recommendation:** Register for GST voluntarily once the payment gateway is integrated. It is free on gst.gov.in and allows you to claim Input Tax Credit (ITC) on server expenses (Render/Vercel/Cloudinary) and Google Maps Platform API billing.

C. Current Account Selection:

- **Modern Neo-Banking (RazorpayX / Jupiter Money / Fi Business):** Instant zero-balance digital current accounts bundled with automated payout APIs, developer-friendly webhooks, and zero maintenance fee requirements for verified startups.
- **Traditional Banks (ICICI iStartup / HDFC SmartUp):** 12 months waiver on Average Monthly Balance (AMB); essential if applying for government tenders or local state subsidy escrow accounts.

Phase 2: Jaipur, Rajasthan Specific Schemes, Funding & Loopholes

2.1 iStart Rajasthan & Bhamashah Techno Hub Integration

The Government of Rajasthan operates India's most aggressive state startup ecosystem through the Department of Information Technology & Communication (DoIT&C:). The flagship **Bhamashah Techno Hub** in Malviya Nagar, Jaipur, provides a direct institutional launchpad for Unplanned.

Step-by-Step iStart Registration:

1. Create an individual Rajasthan Single Sign-On (SSO) ID on sso.rajasthan.gov.in for both co-founders.
2. Navigate to the **iStart Portal** (istart.rajasthan.gov.in) and register 'Unplanned' under the *Social Networking / Travel & Tourism / Hyperlocal Tech* category.
3. Upload Certificate of Incorporation, pitch deck, prototype links (Vercel deployment URL), and founder credentials.
4. **QRate Evaluation:** The iStart committee evaluates startups on a scorecard (Idea, IP, Market Size, Tech Architecture, Scalability). Startups are scored as **Bronze**, **Silver**, or **Gold** certified. Having a live, responsive MERN MVP deployed on Vercel immediately positions Unplanned for **Silver or Gold QRate ranking**.

2.2 Grants & Financial Schemes (100% Zero Equity Dilution)

Rajasthan's Startup Policy 2022 provides substantial non-dilutive financial assistance that technical founders can access without forfeiting equity:

Scheme Name	Financial Assistance	Eligibility & Milestone Requirements	Deployment Strategy for Unplanned
Monthly Sustenance Allowance	Rs. 20,000 / month (Rs. 25,000/mo if female co-founder) for 1 year	Recognized iStart startup with QRate Silver/Gold ranking. Idea/MVP validation stage.	Covers co-founders' personal living expenses in Jaipur during initial 12 months of unpaid bootstrapping.
Idea / Prototype Stage Grant	Up to Rs. 5,00,000 (100% Non-Dilutive Grant)	MVP ready with demonstrated initial user interest and feedback (e.g. initial Jaipur beta explorers).	Funds Google Maps API costs, domain, brand trademarking, and targeted local Jaipur user acquisition campaigns.
Seed Stage Funding (Matching Grant)	Up to Rs. 25,00,000 (Extendable to Rs. 60L for high-impact)	Demonstrated product-market fit, active community footfall, registered commercial entity.	Infrastructure scaling, hiring community campus ambassadors, and expanding to Udaipur & Jodhpur.
Patent & Trademark Reimbursement	Up to Rs. 5,00,000 for patents 100% TM reimbursement	Proof of filing proprietary algorithms (e.g. hyperlocal matching or radial coordinate fuzzing).	Protects the 'Unplanned' brand, logo, and proprietary proximity-clustering algorithms.

2.3 Incubation Perks & Strategic Regulatory Loopholes

A. Bhamashah Techno Hub Facilities (Jaipur):

By securing iStart recognition, Unplanned qualifies for **100% free physical incubation** at the 8-floor Bhamashah Techno Hub (Malviya Nagar, Jaipur). This includes free dedicated air-conditioned workstations, high-speed leased line internet (eliminating office overhead), conference rooms, and access to the Maker Lab for hardware/IoT experiments.

B. The Rajasthan Government Direct Procurement Exemption (RTPP Act Loophole):

GOVTECH PILOT TENDER EXEMPTION

Strategic Regulatory Loophole — Section 15 of Rajasthan Startup Policy & RTPP Rule 198:
Departments under the Government of Rajasthan (such as Rajasthan Tourism, Department of Archaeology & Museums, and Jaipur Smart City Limited) are permitted to award **direct pilot procurement work orders up to Rs. 15 Lakhs without a tender** (or up to Rs. 25 Lakhs through limited quotation) to iStart-registered Rajasthan startups.
Actionable Opportunity: Position Unplanned as an interactive citizen engagement and tourist microadventure discovery engine for the Department of Tourism. Pitch a 'Jaipur Heritage Night Trails' microadventure campaign on Unplanned to secure a non-tendered Rs. 10L-15L pilot work order directly from the state.

Phase 3: Monetization & Business Model Strategy

3.1 Diversified Revenue Streams for Unplanned

Social and microadventure discovery apps face monetization pitfalls if they rely solely on banner ads. Unplanned's high-intent hyperlocal format supports four distinct, complementary revenue engines:

Revenue Stream	Target Segment	Mechanism & Pricing Model	Projected Margin
Premium Explorer Pass (B2C SaaS)	Power explorers, frequent solo travelers, community organizers	Rs. 199/month or Rs. 1,499/year. Unlocks unlimited concurrent Sparks, verified blue explorer aura, extended 50km radar filters, and private secret expeditions.	~95% (Pure software margin)
Promoted Sparks & Beacons (B2B Local)	Cafes, rooftop lounges, bouldering gyms, microbreweries, boardgame parlors	Cost-per-Spark (Rs. 299-599 per promoted weekend event) or Monthly Hub Subscription (Rs. 1,999/mo) with guaranteed pinned placement in the local feed.	~88% (Direct B2B value)
Ticketing / RSVPs Transaction Fee	Curated workshops, heritage walks, pottery sessions, photo walks	Free for non-commercial gatherings. 4%-6% platform convenience fee on paid event tickets processed via integrated gateway (Razorpay/Cashfree).	~70% (After gateway MDR)
Tourism & GovTech Concierge Packs	Rajasthan Tourism Development Corporation (RTDC), luxury boutique resorts	Custom curated adventure passes and sponsored thematic trails (e.g., 'Nahargarh Sunset Cycling', 'Old City Culinary Footprints'). Annual contracts Rs. 2.5L-10L.	~75% (B2B enterprise licensing)

3.2 Go-to-Market (GTM) & Initial Pricing Playbook

In marketplace and consumer social applications, monetization before liquidity kills engagement. The following phased rollout creates sustainable network density before enforcing aggressive paywalls:

- Phase 1: Hyper-Dense Beta in Jaipur (Months 1-3) — 100% Free: Restrict rollout to specific micro-clusters with high natural student/young-professional footfall (e.g., Malviya Nagar / WTP area, C-Scheme cafes, and MNIT / Manipal University campus zones). Target 1,000 active explorer profiles and 200 completed Footprints.
- Phase 2: Commercial Pilot Partnerships (Months 4-6): Onboard 15 anchor local venues in Jaipur (artisanal coffee shops, gaming lounges, trekking groups) with 3 free Promoted Sparks. Demonstrate quantifiable footfall before introducing the Rs. 1,999/month Merchant Hub tier.
- Phase 3: Founder-Friendly B2C Pricing: Introduce the Rs. 199/month Explorer Pass only when daily active expeditions exceed 50 concurrent Sparks, packaging creator perks that make power-users proud to subscribe.

Phase 4: Production Deployment Architecture for Initial Users

4.1 100% Free Hosting Stack Configuration

Unplanned's codebase is structurally optimized to support **1,000-5,000 Monthly Active Users (MAUs)** on a robust, \$0/month production stack:

Component	Free Provider & Tier	Capacity Thresholds	Operational Best Practices
Frontend SPA	Vercel Hobby Tier (Global Edge CDN)	100 GB Bandwidth/mo Unlimited edge requests	Utilize vercel.json rewrites for SPA routing. Immutable cache-control on /assets/(.*).
Backend API	Render Web Service (Free Tier Container)	512 MB RAM, 0.1 vCPU 750 free hours/month	Setup /health endpoint with external 14-min cron ping to prevent cold-start container sleep.
Database	MongoDB Atlas M0 (Shared Replica Set)	512 MB Storage 100 max connections	Geospatial 2dsphere indexes on geometry.coordinates. Connection pool sizing maxPoolSize: 10.
Media Assets	Cloudinary Free Tier (Media CDN)	25 Monthly Credits (~25 GB bandwidth / 25K transformations)	Automatic WebP compression on upload; resize avatars to 200x200; limit vibes to max 5 compressed images.

4.2 Handling Initial Traffic Spikes & Code Architecture

1. Cold-Start Elimination (Render Free Tier):

Render's free web service spins down containers after 15 minutes of silence, inducing a 30-50 second cold-start latency on the next visitor. **Mitigation:** Deploy a free scheduled monitor on cron-job.org or uptimerobot.com to ping <https://your-api.onrender.com/health> every 14 minutes. This keeps the micro-instance warm in memory 24/7 without incurring bills.

2. MongoDB Connection Pool Throttling:

MongoDB Atlas M0 restricts max concurrent connections to 100. In serverless or containerized Express apps without connection limits, uncontrolled traffic bursts can exhaust the pool. In config/db.js, configure: `mongoose.connect(process.env.MONGO_URI, { maxPoolSize: 10, minPoolSize: 2, serverSelectionTimeoutMS: 5000 })`. This caps connection usage and recycles sockets efficiently.

3. Google Maps Platform Quota Protection:

Google Cloud grants a recurring \$200 free monthly credit (equivalent to ~28,000 dynamic map loads). To eliminate surprise billing: (a) In Google Cloud Console, set a strict daily budget alert at \$5; (b) Restrict the API Key by HTTP Referrer to only `unplanned-eight.vercel.app/*` and `localhost:*`; (c) Load maps on demand (only inside VibeDetails and map view modal) rather than universally on background routes.

4. Dual-Mode Token & Cross-Origin Cookie Resilience:

By implementing Bearer Token authentication stored in localStorage alongside SameSite=None; Secure cookies, Unplanned bypasses modern third-party cookie restrictions across decoupled Vercel and Render domains without requiring paid custom root domains.

Phase 5: Cap Table, Compliance & 14-Day Sprint to Launch

5.1 Co-Founder Cap Table & Equity Safeguards

A common point of failure for early-stage tech startups is co-founder disputes. With 2 technical co-founders, implementing clean governance documents during incorporation is vital:

Stakeholder	Equity %	Vesting Terms	Roles & Core Accountabilities
Technical Co-Founder A (CEO / Product)	45.0%	4-Year Vesting with 1-Year Cliff	Product Vision, Frontend/UX Architecture, iStart & GovTech Relations, Community Growth
Technical Co-Founder B (CTO / Infra)	45.0%	4-Year Vesting with 1-Year Cliff	Backend API Hardening, Geospatial DB Optimization, Cloud Reliability, Security & Payments
Unallocated ESOP Pool	10.0%	Governed by Board & ESOP Scheme	Reserved for early core engineers, campus community leads, and strategic advisors

5.2 Data Privacy & Cyber-Law Compliance (DPDP Act 2023)

Because Unplanned processes real-time user location coordinates, compliance with India's **Digital Personal Data Protection (DPDP) Act 2023** is legally mandatory from Day 1:

- **Explicit Geospatial Consent:** Maintain opt-in permission prompts before requesting browser geolocation coordinates. Provide transparent privacy notices stating coordinates are used solely for localized radar matching.
- **Radial Fuzzing Liability Shield:** Approximate coordinates on public feeds (~1km radial buffer) and only unlock exact meeting points once a host approves a participant's join request. This prevents stalker liability and personal data leaks.
- **Account Deletion & Data Erasure:** In compliance with Section 12 of DPDP Act (Right to Erasure), Unplanned's existing deleteAccount API cleanly cascades deletion across user records, authored vibes, and join requests.

FOUNDER 14-DAY SPRINT TO LAUNCH

Immediate 14-Day Founder Execution Sprint:

- **Days 1-3 (Identity & Keys):** Finalize Company Name ('Unplanned Technologies Pvt Ltd') and procure 2 Class-3 DSCs (~Rs. 1,500 total).
- **Days 4-7 (MCA Filing):** File SPICe+ Part A/B on MCA portal for Private Limited incorporation with e-MoA and e-AoA (~Rs. 1,500 stamp duty).
- **Days 8-9 (Banking & Udyam):** Activate zero-balance current account (RazorpayX / ICICI iStartup) and register Udyam MSME (100% Free).
- **Days 10-12 (iStart Portal):** Register Unplanned on istart.rajasthan.gov.in with the live Vercel MVP to achieve QRate Silver/Gold.
- **Days 13-14 (Incubation & Grants):** Apply for free workstations at Bhamashah Techno Hub (Malviya Nagar, Jaipur) and file for the Rs. 20,000/month Founder Sustenance Allowance.
